Subject Index

Absorbers
Hg(II) Adsorption from Aqueous Solutions Using Rice-Husk Ash, 374

Absorption
Applying Covercrete Absorption Test to In-Situ Tests on Structures, 737
Design Considerations for Delayed-Resonator Vibration Absorbers, 182

Abutments
Earthquake-Induced Movements and Seismic Remediation of Existing Foundations and Abutments, 1373

Acceleration
Convergence Acceleration for Iterative Finite-Element Methods, 173
H_∞ Control for Seismic-Excited Buildings with Acceleration Feedback, 280
Stochastic Model for Microgravity Excitation, 29
Trivariate Spectral Modeling of Space Shuttle Flight Data, 35

Accelerators (Particles)
Surface and Underground Geodetic Control for Superconducting Super Collider, 1067

Accelerometers
Lotung Downhole Array. I: Evaluation of Site Dynamic Properties, 462
Lotung Downhole Array. II: Evaluation of Soil Nonlinear Properties, 463

Acceptance tests
Neural Network Method of Estimating Construction Technology Acceptability, 122

Access roads
Routing Large Vehicles on Industrial Construction Sites, 108

Accessibility
Americans with Disabilities Act: Issues for Design and Facility Managers, 698
Routing Large Vehicles on Industrial Construction Sites, 108

Accident data
Analysis of Fatalities Recorded of OSHA, 130
Parametric Empirical Bayes Estimates of Truck Accident Rates, 1119

Accident factors
Identifying Accident-Prone Locations Using Fuzzy Pattern Recognition, 1118

Accidents
Analysis of Fatalities Recorded of OSHA, 130
Parametric Empirical Bayes Estimates of Truck Accident Rates, 1119

Accountability
Employee Performance Standards: What Works Best?, 719

Acetate
Evaluation of Competitive Adsorption in Anaerobic GAC Reactors, 403

Acoustic detection
NDE for Steel Bridges, 1287
Sounding Out Scour, 1356

Acoustic measurement
Imaging of Reinforced Concrete: State-of-the-Art Review, 624

Acoustics
Acoustic-Emission Kaiser Effect in Fly-Ash Cement Mortar under Compression, 766
Evaluation of Plastic Damage in Concrete by Acoustic Emission, 755
Nondestructive Testing Methods for Civil Infrastructure, 1396

Acquisition
The Urge to Merge, 1263

Activated carbon
Effects of Oxidant on Thermal Regeneration of Granular Activated Carbon, 14
Organic Desorption and Chemical Regeneration of Spent Carbon Developed From Fertilizer Waste Slurry, 346
Permeable Barriers to Remove Benzene: Candidate Media Evaluation, 366
Regeneration of Granular Activated Carbon (GAC) Columns Used for Removal of Lead, 396

Activated carbon treatment
Evaluation of Competitive Adsorption in Anaerobic GAC Reactors, 403

Activated sludge
Aerated Anoxic Oxidation-Denitrification Process, 404
Analysis of Structural Features on Performance of Secondary Clarifiers, 431

Activated sludge process
Dynamic Prediction of Wastewater Aeration Basin Temperature, 390
Use of pH as Control Parameter for Aerobic/Anoxic Sludge Digestion, 350

Activation
Inactivation Kinetics of Viral Aggregates, 357
Reactivation of an Ancient Landslide, 782

Active control
Active Control of Multimodal Cable Vibrations by Axial Support Motion, 276
Active Control of Nonlinear Base-Isolated Buildings, 239
Active Control of Structures Using Neural Networks, 226
Active-Control and Forced-Vibration Studies on Highway Bridge, 994
Design Considerations for Delayed-Resonator Vibration Absorbers, 182
Neural Network for Structure Control, 93
Prediction Control of SDOF System, 285
Sliding Mode Control for Nonlinear and Hysteretic Structures, 319

Sliding Mode Control for Seismically Excited Linear Structures, 327
Vibration Control of Moving Flexible Member Using Piezoelectric Actuators, 262

Adaptive systems
Active Control of Nonlinear Base-Isolated Buildings, 239

Adhesive bonding
Environmental and Viscoelastic Effects on Stresses in Adhesive Joints, 30

Adjustment
Adjustment Factors for Heavy Vehicles at Signalized Intersections, 1093

Admixtures
Review of Expansive Alkali-Aggregate Reactions in Concrete, 776
Sludge Ash as Fine Aggregate for Concrete Mix, 393

Adsorbents
Organic Desorption and Chemical Regeneration of Spent Carbon Developed From Fertilizer Waste Slurry, 346

Adsorption
Evaluation of Competitive Adsorption in Anaerobic GAC Reactors, 403
K_d in Screening-Level Ground-Water Contaminant-Transport Model, 382
Modeling Removal of Air Contaminants by Biofiltration, 331
Sorption of Heavy Metals by Prepared Bacterial Cell Surfaces, 402

Advection
2D Advective-Diffusive Transport of Dissolved Oxygen in Channels, 398
Improved Finite-Element Method for Solute Transport, 529

Aeration
Aerated Anoxic Oxidation-Denitrification Process, 404
Apparatus for Down-Well Oxygen Transfer into Contaminated Aquifer, 385
Oxidation-Ditch Process Using Falling Water as Aerator, 341
Weir Aeration: Models and Unit Energy Consumption, 347

Aerators
Oxidation-Ditch Process Using Falling Water as Aerator, 341

Aerial photography
Estimating Cost for Photogrammetric Mapping and Aerial Photography, 1070

Aerobic processes
Use of pH as Control Parameter for Aerobic/Anoxic Sludge Digestion, 350

Aerodynamics
Aerodynamic Stability Analysis of Cable-Stayed Bridges, 1055

Affirmative action
Facilitating Cultural Diversity, 735

Aggregates
Building and Nonpavement Applications of No-Fines Concrete, 778
Development of No-Fines Concrete Pavement Applications, 1109
Effect of Composition on Basic Creep of Concrete and Cement Paste, 310
Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, 763
Inactivation Kinetics of Viral Aggregates, 357
Review of Expansive Alkali-Aggregate Reactions in Concrete, 776
Sludge Ash as Fine Aggregate for Concrete Mix, 393

Aging
Continuous Retardation Spectrum for Solidification Theory of Concrete Creep, 201
Effect of Composition on Basic Creep of Concrete and Cement Paste, 310
Guidelines for Evaluating Aging Penstocks, 1383
HP-GPC Characterization of Asphalt Aging and Selected Properties, 741
Methodology for Defining LMS Portion in Asphalt Chromatogram, 740
Modeling of Thermochemomechanical Couplings of Concrete at Early Ages, 254
A Nonlinear Differential Equation for Modeling Asphalt Aging, 774

Agricultural engineering
Methodology for Optimal Plant Growth Strategies in Life-Support Systems, 34

Agricultural wastes
Agricultural Drainage Effects on Water Quality in Southeastern U.S., 664
Controlled Versus Conventional Drainage Effects on Water Quality, 663
Drainage and Water Quality in Great Lakes and Cornbelt States, 665
Effect of Agricultural Drainage on Water Quality in Humid Portion of Pacific Northwest, 666

Agricultural watersheds
Peak Discharge for Small Agricultural Watersheds, 521

Agriculture
Agricultural Drainage and Water Quality in Mississippi Delta, 667
Continuous-Time Water and Sediment-Routing Model for Large Basins, 531
Drainage and Water Quality in Great Lakes and Cornbelt States, 665
Drainage and Water Quality in Northeastern United States and Eastern Canada, 668
Effect of Agricultural Drainage on Water Quality in Humid Portion of Pacific Northwest, 666
Effect of Agricultural Drainage on Water Quality in Mid-Atlantic States, 669
Impact of Landscape Feature and Feature Placement on Agricultural Non-Point-Source-Pollution Control, 1208
Methodology for Optimal Plant Growth Strategies in Life-Support Systems, 34
Subsurface Drainage Water Quality from Structured Soil, 658
Water Water Everywhere, 1327

Air entrainment
Frost Resistance of Roller-Compacted High-Volume Fly Ash Concrete, 765

Velocity of Air-Core Vortices at Hydraulic Intakes, 10

Air flow

Relative Air Permeability as Function of Saturation in Soil Venting, 360

The Structural Design of Air and Gas Ducts for Power Stations and Industrial Boiler Applications, 1413

Air pollution

Atmospheric Tracer Concentrations from Elevated Source in Urban Core, 329

Cost-Effective Strategies to Control Radon In Residences, 340

Modeling Removal of Air Contaminants by Biofiltration, 331

Observed Downwash Concentrations Compared to ISCST Predictions in Urban Core, 330

Toxic Air Emissions from Wastewater Treatment Facilities, 1414

Air pollution control

Modeling Removal of Air Contaminants by Biofiltration, 331

Air quality

Methodology for Evaluating ATIS Impacts on Air Quality, 1122

Source Apportionment of Wintertime PM_{10} at San Jose, Calif., 362

Air stripping

Cleaning Contaminated Soil Using Electrical Heating and Air Stripping, 387

Air supported structures

Air-Supported Roof Redux, 1291

Air temperature

Comparison of Methods Used to Create Estimate of Air-Freezing Index, 69

Comparison of Vapor-Pressure-Deficit Calculation Methods—Southern High Plains, 654

Air transportation

Future of Airline Hubbed Networks: Some Policy Implications, 1090

Quality-of-Service Model of Intercity Air-Travel Demand, 1091

Air water interactions

Fully Coupled Analysis of Heat, Moisture, and Air Transfer in Unsaturated Soil, 210

Aircraft

Contact-Element Model for Dynamic Analysis of Jointed Concrete Pavements, 1129

Multigrid Computation of Flow Past Airfoil Using k-ϵ Turbulence Model, 39

Airfields

Mechanistic Evaluation of Rigid Airfield Pavements, 1134

Spectral Reflectance Properties of Different Types of Built-Up Surfaces, 22

Airlines

Future of Airline Hubbed Networks: Some Policy Implications, 1090

Model to Reduce Airline Schedule Disturbances, 1114

Airport access

Airport Choice in Multiple-Airport Region, 1115

Airport construction

Hong Kong Flies into the Future, 1253

Quality-of-Service Model of Intercity Air-Travel Demand, 1091

Airport control towers

Fire-Safety Upgrades in Airport Control Towers, 627

Airport terminals

Down-to-Earth Terminal Design, 1261

Space Standards for Sizing Air Terminal Check-In Areas, 1092

Airports

Airport Choice in Multiple-Airport Region, 1115

Future of Airline Hubbed Networks: Some Policy Implications, 1090

Hong Kong Flies into the Future, 1253

Positive Feedback Model of Multiple-Airport Systems, 1132

Transportation Congress, Volumes 1 and 2 - Civil Engineers - Key to the World's Infrastructure, 1416

Alfalfa

Alfalfa Yield Response to Ground Water after Termination of Irrigation, 677

Modeling Deficit Irrigation in Alfalfa Production, 689

Algae

Low-Energy Mixing in Algal Culture Raceways, 170

Algorithms

Algorithm for Resistance to Flow and Transport in Sand-Bed Channels, 569

Automatic Fire—Code Checking Using Expert-System Technology, 91

Concurrent Structural Optimization on Massively Parallel Supercomputer, 1030

Convergence Acceleration for Iterative Finite-Element Methods, 173

Counterpropagation Neural Networks in Structural Engineering, 980

Distributed Finite-Element Analysis on Network of Workstations—Algorithms, 1013

Distributed Finite-Element Analysis on Network of Workstations—Implementation and Applications, 1014

Distributed Genetic Algorithm for Structural Optimization, 36

Downstream Control of Multireach Canal Systems, 653

Enhancing Branch-and-Bound Method for Structural Optimization, 934

Evolution Program for Design of Rectilinear Branched Networks, 88

Extracting Topological Relationships from Wire-Frame CAD Model, 83

Generalized Network Algorithm for Water-Supply-System Optimization, 1199

Geometrically Simple Logarithmic Weir, 686

Multimedia Data Model for Video-Detection Research, 1123

Optimal Scheduling of Urban Transit Systems Using Genetic Algorithms, 1144

Parallel-Vector Algorithms for Analysis of Large Structures, 25

Peak-Flow Forecasting with Genetic Algorithm and SWMM, 573

Planned Operation of Large-Scale Water-Distribution System, 1182
Processing of Constraints in Transportation Network Design Problem, 82
Rational Design of Shoring-Tower–Based Formwork, 136
Rubber-Sheeting Algorithm for Cadastral Maps, 1076
Sequencing for Concrete Placement Using RAG—CAD Data Structure, 98
Sizing, Shape, and Topology Design Optimization of Trusses Using Genetic Algorithm, 1017
Structural System Identification. II: Experimental Verification, 199
Structural-System Identification. I: Theory, 198
Survey of Discrete Variable Optimization for Structural Design, 886
Time-Domain Parameter Estimation Algorithm for Structures. I: Computational Aspects, 213
Time-Domain Parameter Estimation Algorithm for Structures. II: Numerical Simulation Studies, 214
The Tonias Algorithm, 1073
Two-Dimensional Magnetic Algorithm to Detect Reinforcing Steel, 754

Alkalinity
Review of Expansive Alkali-Aggregate Reactions in Concrete, 776

Allocations
Capacity-Allocation Methods for Reducing Urban Traffic Congestion, 1081
Positive Feedback Model of Multiple-Airport Systems, 1132

Alluvial channels
Algorithm for Resistance to Flow and Transport in Sand-Bed Channels, 569
Alluvial Channel Geometry: Theory and Applications, 541
Bed Configuration and Hydraulic Resistance in Alluvial-Channel Flows, 519
Bed-Load Motion at High Shear Stress: Dune Washout and Plane-Bed Flow, 538
Modeling Non-Uniform-Sediment Fluvial Process by Characteristics Method, 530

Alluvial streams
Comparison of Width and Friction Factor Predictors and Implications, 553
Effects of Sediment on Drainage-Culvert Serviceability, 792
Experiment in Stream Restoration, 559
Near-Bank Impacts of River Stage Control, 533
Optimal Control Approach for Sedimentation Control in Alluvial Rivers, 1201
Optimization Modeling for Sedimentation in Alluvial Rivers, 1181
Prediction of Effects of Woody Debris Removal on Flow Resistance, 543
Sand-Dune Geometry of Large Rivers During Floods, 579

Alumina
Fouling of Reverse Osmosis Membranes by Aluminum Oxide Colloids, 428

Ambient air quality
Receptor Modeling Approach to VOC Emission Inventory Validation, 375

Amplification
Discrete-Time Analysis of Seismic Site Amplification, 256
Dynamic Testing Procedures for Highway Bridges Using Traffic Loads, 892

Anaerobic filters
Equilibrium Model of Anaerobic Reactors, 334

Anaerobic processes
Hexavalent Chromium Removal in Two-Stage Bioreactor System, 417
Novel Design for Constant-Pressure Water-Displacement Gas Collector, 405
UASB Treatment of Wastewater Containing Concentrated Benzoate, 409
UASB Treatment of Wastewater with Concentrated Mixed VFA, 343

Analysis
Analysis and Design of Steel Frames Considering Panel Joint Deformations, 1023
Analytical Framework for Waste-Facility Siting, 1154
Analytical Solution to Two-Dimensional Axisymmetric Gas Flow with Klinkenberg Effect, 367
Analytical Solutions of Seepage Into Ditches From Ponded Fields, 683
Calculation of Eigenvectors with Uniform Accuracy, 274
Drought Analysis with Reservoirs Using Tree-Ring Reconstructed Flows, 550
EBEF Method for Distortional Analysis of Steel Box Girder Bridges, 909
Free-Vibration Analysis of Compressed Clamped Circular Plates, 324
Frequency-Domain Analysis of Electrical Dispersion of Soils, 486
Fully Coupled Analysis of Heat, Moisture, and Air Transfer in Unsaturated Soil, 210
Minimum Thickness of Compacted Soil Liners: II. Analysis and Case Histories, 16
Performance of New Sandwich Tube Under Axial Loading: Analysis, 1059
Second-Order Inelastic Analysis of Steel Frames Using Element with Midspan and End Springs, 907

Analytical techniques
Comparative Assessment of AHP and MAV in Highway Planning: Case Study, 1098
Cumulative Mass Approach for Column Testing, 493
Cyclic Behavior of Structural Steels. II: Theory, 299
Managing Railway Fixed Plant, 628
Storage-Reliability-Resilience-Yield Relations for Northeastern United States, 1196

Anchorages
Long-Term Pullout Behavior of Polymeric Geogrids, 496

Anchors
Behavior of Grouted Anchors Subjected to Repeated Loadings in Field, 465
Foundation Upgrading and Repair for Infrastructure Improvement, 1377
Profile and Frictional Capacity of Embedded Anchor Chains, 505

Anemometers
Measurement of Turbulent Flow in Standard Jar Test Apparatus, 430

Anisotropic soils
Analytical Solutions of Seepage Into Ditches From Ponded Fields, 683

Anisotropy
Analytical Solution to Two-Dimensional Axisymmetric Gas Flow with Klinkenberg Effect, 367
Anisotropic Damage of Fiber-Reinforced MMC Using Overall Damage Analysis, 304
Continuum Versus Structural Approach to Stability of Reinforced Soil, 445
Imperfection Sensitivity of Layered Composite Cylinders, 257
Mechanical and Ultrasonic Anisotropic Response of Soil, 248
Mechanical Properties of Polyurethane-Foam Impact Limiters, 224
Nonlinear Behavior of Concrete Dams Using Damage Mechanics, 223
Role of Topography and Anisotropy When Selecting Unlined Pressure-Tunnel Alignment, 514
Scaled Memory Model for Undrained Behavior of Anisotropic Clays, 500

Approximation
Random Vibration of Nonlinear System under Non-white Excitations, 234

Approximation methods
Approximate Analysis of Building Frames for Vertical Loads, 929
First-Order Reliability Analysis of Wood Structural Systems, 906
Hybrid Approach to Uniform Flow Past Two Cylinders, 208
Implications of Using Approximate Expressions for Well Function, 691
Reliability of Polygonal Boundary of Land Parcel, 1077
Routing Equations for Detention Reservoirs, 607
Simplified Design Method for Braced Double Skinned Structure in Lunar Application, 40
Survey of Discrete Variable Optimization for Structural Design, 886

Aquatic habitats
Environmental Hydraulics of Large Woody Debris in Streams and Rivers, 363
Experiment in Stream Restoration, 559

Aquifers
Artificial Recharge of Ground Water, II, 1362
Beyond Water Witching, 1310
Effect of Surface Source Variation on Seawater Intrusion in Aquifers, 646
Field Evaluation of Aquifer-Recharge Model, 681
Ground-water Flow into Nonpenetrating Well, 637
Non-Aqueous-Phase Fluids in Heterogeneous Aquifers-Experimental Study, 386
Pumping-Test Analysis of Wells Having Storage Contribution, 662
Safe Yield of Aquifers, 1157
Stochastic Recharge Model for Edwards Aquifer in Central Texas, 1210

Arbitration
Construction Documentation in Arbitration, 129
Use of Alternative Dispute Resolution in the Construction Industry, 700

Archaeology
Bridge to the Past, 1255

Arches
Design of Top Chord of Stressed-Arch Frames, 877
Effects of Fabrication Process on Prestressed Composite Arches, 872
The Masonry Arch Reconsidered, 44
Prebuckling Deformations and Flexural-Torsional Buckling of Arches, 995
Tests and Nonlinear Analyses of Small-Scale Stressed-Arch Frames, 876

Architect/engineers
Architecture and Engineering at Princeton University, 52
Documenting Design-Build, 1328
The Urge to Merge, 1263
Vision for ASCE's Architectural Engineering Division, 41

Architects
Marketing Function in U.K. Construction Contracting and Professional Firms, 720

Architecture
Architecture and Engineering at Princeton University, 52
Bridge Aesthetics: World View, 986
Design of Concrete Tracery Trusses to Define Architectural Space, 42
Penn State Architectural Engineering, 57
Schematic Layout Design in SEED Environment, 60
SEED-Pro: Computer-Assisted Architectural Programming in SEED, 59

Arctic regions
Estimation of Burial Depths for Pipelines in Arctic Regions, 76

Arid lands
Estimation of Peak Discharge Using GIUH Model in Saudi Arabia, 1185
Frequency Estimation for Hydrological Samples with Zero Values, 1167
Hydrologic Routing of Flow in Arid Ephemeral Channels, 555
Water Supplies Versus Demand in Countries of Arabian Peninsula, 1178

Arizona
Freeway through a Superfund Site, 1350
Stormwater Management Solution, 1314

Armor units
Armor-Limited Clear-Water Contraction Scour at Bridges, 558

Aromatic hydrocarbons
Maximum Likelihood Method for Parameter Estimation in Linear Model with Below-Detection Data, 414
Modeling of NOM-Facilitated PAH Transport Through Low-f_{oc} Sediment, 369
UASB Treatment of Wastewater Containing Concentrated Benzoate, 409

Arterial highways
Vehicle and Pedestrian Accident Models for Median Locations, 1142

Artesian aquifers
Implications of Using Approximate Expressions for Well Function, 691

Artificial intelligence
Computing in Civil Engineering, 1367
Design-Integrated Process Planner for Rebar Placement, 92
Modeling Initial Design Process Using Artificial Neural Networks, 95
Principled Approach to Design of Hierarchical Abstractions, 94
Qualitative Geometric Reasoner for Integrated Design, 102
System that Learns to Design Cable-Stayed Bridges, 966
Using Design Intent for Interpreting Brand-Name-or-Equal Specifications, 84

Artificial recharge
Artificial Recharge of Ground Water, II, 1362
Field Evaluation of Aquifer-Recharge Model, 681

ASCE Awards & Prizes
Application of Hybrid Sliding Isolation System to Buildings, 1
Application of Hybrid Sliding Isolation System to Buildings, 4
Bullwinkle's Big Brother, 1306
Computer-Aided Planning for Heavy Lifts, 17
Cost Model for Low-Pressure Membrane Filtration, 13
*D*iscussion of: Evaluation of Supercritical/Subcritical Flows in High-Gradient Channel, 8
Do Civil Engineers Have an Ethical Responsibility to their Client at the Expense of the Environment?, 6
Effects of Oxidant on Thermal Regeneration of Granular Activated Carbon, 14
Fatigue of Prestressed Concrete Beams with Inclined Strands, 15
Geotechnology in Dispute Resolution, 476
The Magnificent 17, 1308
Minimum Thickness of Compacted Soil Liners: II. Analysis and Case Histories, 16
Model for Treatment of Trichloroethylene by Methanotrophic Biofilms, 7
Parametric Study on Collapse Loads of Skew Composite Bridges, 2
Putting Waste to Work (an Engineer's Obligation to the Environment), 5
Seismic Response of Full-Scale Five-Story Reinforced-Masonry Building, 11
Settlement Prediction for Driven Piles and Pile Groups, 3
Three-Dimensional Eutrophication Model of Chesapeake Bay, 18
Tracking and Steering Systems in Trenchless Construction, 9
Triumphant Arches, 1307
Velocity of Air-Core Vortices at Hydraulic Intakes, 10
Working Stress Design Method for Reinforced Soil Walls, 12

ASCE Code of Ethics
Evolution of the American Society of Civil Engineers Code of Ethics, 805
Is Competitive Price Bidding for Professional Services Ethical? Another View, 860

ASCE Outstanding Civil Engineering
Bullwinkle's Big Brother, 1306
The Magnificent 17, 1308
Triumphant Arches, 1307

ASCE Policy
Implementing ASCE Water Conservation Policy, 1165

ASCE Professional Divisions
ASCE Salary Survey 1995, 1363

ASCE Publications
Transactions of the American Society of Civil Engineers 1994, 1415

ASCE Technical Divisions
Vision for ASCE's Architectural Engineering Division, 41

Ashes
Hg(II) Adsorption from Aqueous Solutions Using Rice-Husk Ash, 374
Sludge Ash as Fine Aggregate for Concrete Mix, 393

Asia
Environmental Challenge for Engineers: Hong Kong Perspective, 836
Statement as Discussion Opener at Session II, 818

Asphalt cement
Correspondence Principle for Characterization of Asphalt Concrete, 743
HP-GPC Characterization of Asphalt Aging and Selected Properties, 741

Asphalt mix design
Evaluation of Polymer-Modified Asphalt Concrete Mixtures, 750

Asphalt pavements
Investigation of Bonding between Asphalt Layers on Road Construction, 1112
A Nonlinear Differential Equation for Modeling Asphalt Aging, 774
Viscoelastic Approach to Rutting in Flexible Pavements, 1086

Asphalts
Methodology for Defining LMS Portion in Asphalt Chromatogram, 740
A Nonlinear Differential Equation for Modeling Asphalt Aging, 774
Standardized Elastic Moduli of Pavement Layers for Overlay Design, 1101

Assessments
Planning and Programming for Military-Facility Reuse, 50

Asymmetric structures
Seismic Response of Asymmetric Structures to Multiple Ground Motions, 1026

Attenuation
Frequency-Dependent Stress Wave Attenuation in Cement-Based Materials, 247

Attitudes
Environmental Challenge for Engineers: Hong Kong Perspective, 836
Risk Management Perceptions and Trends of U.S. Construction, 156

Audits
Environmental Audit: Indian Scenario, 373
Turning Down the Power, 1322

Autocorrelation
Conditional Frequency Analysis of Autocorrelated Lake Levels, 1172

Automated transit vehicles
Vehicle Kinematics and its Application to Highway Design, 1084

Automatic identification systems
Radio-Frequency Identification Applications in Construction Industry, 127

Automation
Automatic Fire—Code Checking Using Expert-System Technology, 91
Automatic Irrigation Scheduling System (AISSUM): Principles and Applications, 640
Automatic Optimal Design of Tall Steel Building Frameworks, 935
The Bell Tolls for Toll Booths, 1320
The Circle: Architecture for Integrating Software, 89
COCSY I: CAM-Oriented CAD System, 100
Computer-Aided Planning for Heavy Lifts, 17
Construction Automation and Robotics—Pathway to Implementation, 123
Construction Congress, 1368
Evaluation of New Underground Infrastructure-Maintenance Technologies, 632
Fundamental Analysis of Robotic Excavation, 38
Intelligent Excavator Control System for Lunar Mining System, 21
Real-Time Position Measurement Integrated with CAD: Technologies and Their Protocols, 147
Simulation of Automated Data Collection in Buildings, 81
What Do Project Managers Need to Know about CADD?, 696

Automobiles
Statement as Discussion Opener at Session II, 818

Auto-regressive models
Stochastic Recharge Model for Edwards Aquifer in Central Texas, 1210
Trivariate Spectral Modeling of Space Shuttle Flight Data, 35

Auto-regressive moving-average model
Prediction Control of SDOF System, 285
Short-Term Prediction of Traffic Volume in Urban Arterials, 1104
System Identification and Its Application to Estimating Soil Properties, 479

Axial loads
Behavior of Three-Span Braced Columns with Equal or Unequal Spans, 953
New Analysis for Creep Behavior in Concrete Columns, 895
Performance of New Sandwich Tube Under Axial Loading: Experiment, 1058
Performance of New Sandwich Tube Under Axial Loading: Analysis, 1059
Theoretical and Experimental Study on Buckling of Built-up Columns, 291

Backfills
Case Study of the Settlement of Gravelly Sand Backfill, 793

Backwashing
The Inside Story of Water-Treatment Processes, 423
Role of Short-Range Forces in Particle Detachment during Filter Backwashing, 425

Bacteria
Cometabolic Degradation of TCE and DCE Without Intermediate Toxicity, 416
Model of Carbon Cycling in Planktonic Food Webs, 399

Baffles
Analysis of Structural Features on Performance of Secondary Clarifiers, 431
Effect of Baffles on Submerged Flows, 577

Bank erosion
Near-Bank Impacts of River Stage Control, 533

Bank stabilization
Gabion-Mattress Channel-Protection Design, 563

Barges
Return Flow in Rivers Due to Navigation Traffic, 611

Barriers
Ability of Subsoils to Buffer Extremely Acidic Simulated Coal-Pile Leachates, 419
Development of Effective Rockfall Barriers, 1139
Overcoming Barriers to Successful Constructability Implementation Efforts, 787
Permeable Barriers to Remove Benzene: Candidate Media Evaluation, 366

Bars
Design-Integrated Process Planner for Rebar Placement, 92
Elastica of Simple Variable-Arc-Length Beam Subjected to End Moment, 251
Nearshore Bar Development in Southern Gulf of St. Lawrence, 1217

Basalt
Properties of Lunar Soil Simulant JSC-1, 27

Base isolation
Active Control of Nonlinear Base-Isolated Buildings, 239
Application of Hybrid Sliding Isolation System to Buildings, 1
Application of Hybrid Sliding Isolation System to Buildings, 4
Base Isolation Gets Its Day in Court, 1260
Rock Steady, 1331
Sliding Mode Control for Nonlinear and Hysteretic Structures, 319
Vibration Isolation of Launch Vehicle Payload and Its Subsystem, 19

Basins
Estimation of Peak Discharge Using GIUH Model in Saudi Arabia, 1185
Evaluation of Evaporation-Pan Networks, 674
Spatial Trends in Pearson Type III Statistical Parameters, 581

Bauschinger effect
Model for Predicting Cyclic Behavior of Reinforcing Steel, 898

Bayesian analysis
Parametric Empirical Bayes Estimates of Truck Accident Rates, 1119

Beach erosion
Effect of Water-Table Manipulation on Beach Profiles, 1225

Beach nourishment
Assessment and Prediction of Beach-Nourishment Evolution, 1231
Estimating Landward Migration of Nearshore Constructed Sand Mounds, 1239
A Second Life for Dredged Material, 1351

Beaches
Comparison of Two-Dimensional and Three-Dimensional Beach Profiles, 1227
Effect of Water-Table Manipulation on Beach Profiles, 1225
Monitoring Completed Coastal Projects, 791
Nearshore Surveying: Accuracy and Techniques for Improvement, 1071

Beam columns
Beam-Column Modeling, 313
Effects of External Pressure on Capacity of Tubular Beam-Columns, 1034
Experimental Performance of Seismic Steel Beam-Column Moment Joints, 945

Beams
Analysis of Concrete Masonry Beams, 1031
Analytical Immediate and Long-Term Deflections of Fiber-Reinforced Concrete Beams, 923
Analytical Model for Fictitious Crack Propagation in Concrete Beams, 174
Beam on Viscoelastic Foundation and Layered Beam, 206
Beam-Type Bending of Space-Based Inflated Membrane Structures, 31
Comprehensive Model for Study of Shear in Thin-Webbed RC and PC Beams, 1060
Cross Stiffeners for Beams in Torsion, 969
Design of Prestressed Concrete Beams with Openings, 941
Distortional Buckling of Thin-Walled Beams/Panels. I. Theory, 926
Distortional Buckling of Thin-Walled Beams/Panels. II. Design Methods, 927
Dynamic Analysis of Infinite Beam on Modified Vlasov Subgrade, 1130
Dynamic Analysis of Prestressed Concrete Beams with Openings, 963
Effect of Construction Procedures on Reinforced-Concrete Beams, 958
Elastica of Simple Variable-Arc-Length Beam Subjected to End Moment, 251
Fracture Energy Determination of Quasi-Brittle Materials, 758
Innovative Design of FRP Combined with Concrete: Long-Term Behavior, 965
Innovative Design of FRP Combined with Concrete: Short-Term Behavior, 964
Lateral-Buckling Tests of Cold-Formed RHS Beams, 1027
Modulus of Rupture: Size Effect Due to Fracture Initiation in Boundary Layer, 924
Prestressed High-Strength Concrete Beams Under Torsion, 990
Reducing Section Modulus of Beams by Adding Cross Sectional Area, 217
Reliability of RC Members Strengthened With CFRP Laminates, 960
Role of Spandrel Beams on Response of Slab-Beam-Column Connections, 896
Singularities in RC Beam Elements with Finite-Length Hinges, 865
Stiffness-Matrix Formulation of Beams with Shear Effect on Elastic Foundation, 988
Tests on Shear Capacity of Reinforced Concrete, 1039
Timber Beams with Holes: Fracture Mechanics Approach, 879
Timoshenko Beam-Bending Solutions in Terms of Euler-Bernoulli Solutions, 250

Bearing capacity
Bearing Capacity of Footings over Two-Layer Foundation Soils, 466
Bearing Capacity of Hydrated Geosynthetic Clay Liners, 439
Breakthrough Loads of Floating Ice Sheets, 65
Centrifugal Modeling of Bearing Capacity of Shallow Foundations on Sands, 494
Dynamic Assessment of Bridge Load-Carrying Capacities. I, 902
Dynamic Assessment of Bridge Load-Carrying Capacities. II, 903
Governing Stresses in Z-Purlin Lap Joints, 1049
Seismic Bearing Capacity of Foundation on Cohesionless Soil, 457
Square and Rectangular Hollow Sections Under Transverse End-Bearing Force, 996
Touchdown for O-Cell Test, 1264

Bearings
Modeling of Rubber and Lead Passive-Control Bearings for Seismic Analysis, 971
Nonlinear Elastic Deformations and Stability of Laminated Rubber Bearings, 284
Rotation of High Load Multirotational Bridge Bearings, 925

Bed load
Bed-Load Motion at High Shear Stress: Dune Washout and Plane-Bed Flow, 538

Software Environment to Support Early Phases in Building Design (SEED): Overview, 58

Leachates
Ability of Subsoils to Buffer Extremely Acidic Simulated Coal-Pile Leachates, 419
Flow Investigation for Landfill Leachate (FILL), 333
Landfill Closures...Environmental Protection and Land Recovery, 1390
Leachate-Recycle Infiltration Ponds, 372

Leaching
Fate of Nitrogen Applied to Turfgrass-Covered Soil Columns, 682
Operational Strategy for Metal Bioleaching Based on pH Measurements, 381
Removing Metals From Soil, 1344
Subsurface Drainage Water Quality from Structured Soil, 658
Termiticide Leachate from Building Foundation Drains, 672

Lead
Chemical Conditioning of Electrode Reservoirs During Electrokinetic Soil Flushing of Pb-Contaminated Silt Loam, 418
Lead Removal from Soils via Bench-Scale Soil Washing Techniques, 401
Modeling of Rubber and Lead Passive-Control Bearings for Seismic Analysis, 971
Regeneration of Granular Activated Carbon (GAC) Columns Used for Removal of Lead, 396

Leadership
Book Club: Grassroots Introduction to TQM, 846
Environmental Challenge for Engineers, 807
The Importance of Engineering Leadership in the Government Sector, 723

Urban Regeneration and the Urban Challenge, 833

Leakage

Leakage Control in Long-Duration Testing of Triaxial Specimens, 507

Learning curve

Counterpropagation Neural Networks in Structural Engineering, 980

Least squares method

Estimation of Unit Hydrograph by Ridge Least-Squares Method, 660

Least-Squares Solution for Dangling-Line Case in Cadastral-Map Resurvey, 1069

Left-turns

Accidents on Suburban Highways—Tenessee's Experience, 1105

Legal factors

From Partnership to Corporation, 695

Guidelines for Cloud Seeding to Augment Precipitation, 1381

Insurance and the Environmental Engineer, 1277

Is Competitive Price Bidding for Professional Services Ethical? Another View, 860

Manage Your Claims Before They Manage You, 702

Use of Extrinsic Evidence to Aid Interpretation of Deeds, 1078

Legislation

Americans with Disabilities Act: Issues for Design and Facility Managers, 698

Legislation Framework and Planning: Birmingham, U.K.—Case Study, 819

Legislative Framework and Planning, 834

Urban Regeneration and the Urban Challenge, 833

Levees

Hydraulic Design of Flood Control Channels, 1386

Liability

Coping with Uncertainty in Environmental Construction: Decision-Analysis Approach, 150

Development of Cleanup Protocol for Contaminated Sites in Canada, 820

Engineers and ADA, 1258

Insurance and the Environmental Engineer, 1277

Written Document and Civil Litigation, 808

Licensing

Early History of Professional Registration in United States, 809

Life cycles

Consideration of Design Life of Structures, 795

Economic Benefits of Lightweight versus Conventional Construction Methods, 111

First-Order Reliability Analysis of Wood Structural Systems, 906

Incorporating Life-Cycle Costs in Highway-Bridge Planning and Design, 1128

Inspection, Maintenance, and Repair with Partial Observability, 620

Methodology to Review Cost-Effective Highway Sign Retroreflective Sheeting Policy, 1096

Postoccupancy Evaluation of Buildings and Development of Facility Performance Criteria, 49

State Increment Method of Life-Cycle Cost Analysis For Highway Management, 626

Life support systems

Compatibility of Russian Life-Support Systems to Future Space Missions, 26

Methodology for Optimal Plant Growth Strategies in Life-Support Systems, 34

Lifeline systems

Critical Issues and State-of-the-Art in Lifeline Earthquake Engineering, 1370

Lifeline Earthquake Engineering, 1392

Northridge Earthquake: Lifeline Performance and Post-Earthquake Response, 1397

Lift

Development of Wheelchair-Lift Prototype for Transit Buses, 1100

Hybrid Approach to Uniform Flow Past Two Cylinders, 208

Steady-State Analysis of Underwater Cables, 1221

Lift slab construction

Dynamic Force Effect on Collapse of L'Ambiance Plaza, 788

Lifting

Computer-Aided Planning for Heavy Lifts, 17

Criteria for Incipient Motion of Spherical Sediment Particles, 556

Limestone

Artificial Neural Networks and Durability of Sphinx Limestone, 759

Fracture Mechanical Behavior of Aggregate–Cement Matrix Interfaces, 763

Limit analysis

Bearing Capacity of Footings over Two-Layer Foundation Soils, 466

Comprehensive Model for Study of Shear in Thin-Webbed RC and PC Beams, 1060

Continuum Versus Structural Approach to Stability of Reinforced Soil, 445

Limit design

Limit Behavior of Stone Arch Bridges, 961

Limit states

Continuum Versus Structural Approach to Stability of Reinforced Soil, 445

Experimental Study on Steel Beams Curved in Plan, 881

Limit States of Load-Path-Dependent Structures in Basic Variable Space, 203

Reliability of Reinforced-Concrete Cylindrical Shells, 890

Strength of Composite Beams with Web Concrete Under Negative Bending, 975

Limiting factors

Predicting Incident Size from Limited Information, 371

Linear analysis

Buckling Analysis of Thin-Walled Members with Variable Thickness, 944

Effects of Linearizing on Rocking-Block Toppling, 972

Linear programming

Construction Time-Cost Trade-Off Analysis Using LP/IP Hybrid Method, 159

Efficiency of Water-Supply and Sanitation Projects in Ghana, 617
Optimal Reservoir Control for Hydropower on Colorado River, Texas, 1205
Planned Operation of Large-Scale Water-Distribution System, 1182

Linear systems
Stochastic Response Cumulants of MDOF Linear Systems, 301

Linearity
Linear Hysteretic Damping and the Hilbert Transform, 233

Liners
Buckling of Encased Elliptic Thin Ring, 318
Fractal Approach to Measuring Roughness of Geomembranes, 469
Long-Term Structural Behavior of Pipeline Rehabilitation Systems, 633
Minimum Thickness of Compacted Soil Liners: II. Analysis and Case Histories, 16
Permeability of Clay-Modified Fly Ash under Thermal Gradients, 760

Liquefaction
Aspects of Compaction Grouting of Liquefiable Soil, 511
Empirical Prediction of Liquefaction-Induced Lateral Spread, 459
Liquefaction Analysis of Saturated Reinforced Granular Soils, 489
Liquefaction and Postliquefaction Behavior of Sand, 446
Liquefaction Behavior of Sand-Gravel Composites, 456
Liquefaction of Sand Under Bidirectional Monotonic and Cyclic Loading, 513
Liquefaction Resistance Using CPT and Field Case Histories, 512
Liquefaction under Random Loading: Unit Energy Approach, 502
Liquefaction-Induced Ground-Surface Disruption, 506
Modeling Lateral Sliding of Slope due to Liquefaction of Sand Layer, 508
Plane-Strain Instability of Saturated Porous Media, 244
Reconsideration of Initiation of Liquefaction in Sandy Soils, 453
Residual Strength and Large-Deformation Potential of Loose Silty Sands, 516
System Identification and Its Application to Estimating Soil Properties, 479

Liquids
Microstructural Changes in Sand-Bentonite Soils when Exposed to Aniline, 442

Litigation
Are Contract Disputes Predictable?, 148
Enforcement of Liquidated Damages, 161
Geotechnology in Dispute Resolution, 476
Have I Reached Substantial Completion?, 121
Understanding Defective Specifications, 114
Use of Alternative Dispute Resolution in the Construction Industry, 700
Written Document and Civil Litigation, 808

Load distribution
Determination of Wind-Induced Fatigue Loading on Roof Cladding, 275
Diaphragm Effectiveness in Prestressed-Concrete Girder Bridges, 1001
Estimation of Lane Distribution of Truck Traffic for Pavement Design, 1103
Lateral Response of Three-Row Groups in Loose to Dense Sands at 3D and 5D Pile Spacing, 468
Prediction of Heavy-Vehicle Weight Distributions, 1094
System Factors for Light-Frame Wood Truss Assemblies, 885

Load factors
Calibration of LRFD Bridge Code, 985
Engineering Wood Construction: Structural Properties for LRFD, 999
Progressive-Collapse Loads for Flat-Roof Structures, 959

Load resistance
Liquefaction Behavior of Sand-Gravel Composites, 456

Load tests
Cast-Iron-Column Strength in Renovation Design, 796
Evaluation of Polymer-Modified Asphalt Concrete Mixtures, 750
Experimental Observation of Microstructural Behavior of Concrete, 746
Long-Term Pullout Behavior of Polymeric Geogrids, 496
Mechanical Method to Evaluate Safety Factors in Buried Pipes, 1087
Performance of Axially Loaded Steel Pipe Piles Driven in Soft Rock, 458
Risk-Based Proof-Load Requirements for Bridge Evaluation, 908
Seismic Load Tests on Two-Story Waffle–Flat-Plate Structure, 991
Touchdown for O-Cell Test, 1264
Welded Interior Box-Column to I-Beam Connections, 933

Load transfer
Component Dowel-Bar Model for Load-Transfer Systems in PCC Pavements, 1110
Development of t-z Curves for Cemented Fine-Grained Soil Deposits, 515
Engineering a Landslide, 1315
Rock Steady, 1331

Loading
Interval Algebra to Deal with Pattern Loading and Structural Uncertainties, 297
UASB Treatment of Wastewater with Concentrated Mixed VFA, 343

Loading rate
Analysis of Earth-Moving Systems Using Discrete-Event Simulation, 152
Design of Long-Term Sludge-Loading Rates for Forests Under Uncertainty, 392
Tracking a Serial Filter, 1332
UASB Treatment of Wastewater Containing Concentrated Benzoate, 409

Loads
Buckling of Elastic Columns Using Convex Model of Uncertain Springs, 260
Combined Equation for Sizing Timber Columns, 1048
Compression of Bonded Annular Rubber Blocks, 237
Dynamic Response Analysis of Slab-Type Bridges, 866
Empirical Stochastic Silo Load Model. I: Correlation Theory, 277
Empirical Stochastic Silo Load Model. II: Data Analysis, 278
Empirical Stochastic Silo Load Model. III: Reliability Applications, 279
Fatigue Assessment of Through Plate Girder Railway Bridges, 1033
Load Space Reliability Formulation for Poisson Pulse Processes, 253
Nonlinear Shear-Wall Analysis, 1035
Profile and Frictional Capacity of Embedded Anchor Chains, 505
Rotation of High Load Multirotational Bridge Bearings, 925
Structural Responses of Transit Buses: Impact of Seat-Belt Loads, 1141

Local area networks
Distributed Finite-Element Analysis on Network of Workstations—Implementation and Applications, 1014
Distributed Finite-Element Analysis on Network of Workstations—Algorithms, 1013
Distributed Genetic Algorithm for Structural Optimization, 36

Local governments
SOS For Small-Town SSOs, 1341

Location
Area Computation by Coordinates, 1075
Identifying Accident-Prone Locations Using Fuzzy Pattern Recognition, 1118

Locks
Approximating Delays at Interdependent Locks, 1245
Mitigating Salt-Water Intrusion through Hiram M. Chittenden Locks, 1236
Taming the Red River, 1303

Logic programming languages
Intelligent Excavator Control System for Lunar Mining System, 21

Long waves
Long Waves due to Interactions beneath Wave Groups, 1247
Modeling of Breaking and Nonbreaking Long-Wave Evolution and Runup Using VTCS-2, 1246

Low-rise buildings
Wind-Resistant Low-Rise Buildings in the Tropics, 804

Magnesium
Disappearance of Reduced Manganese in Reservoir Tailwaters, 355

Magnetic fields
Heat Transfer in Hydromagnetic Couette Flow of Compressible Newtonian Fluid, 179
Two-Dimensional Magnetic Algorithm to Detect Reinforcing Steel, 754

Magnetic levitation trains
High-Speed Ground Transportation Development Outside United States, 1127

Maintenance
Case Histories of the Design, Construction, and Maintenance of Rubble Mound Structures, 1364
Concept of Significance Index for Maintenance and Design of Pipe Networks, 600
Equipment Resource Management into the 21st Century, 1375
Evaluation of New Underground Infrastructure-Maintenance Technologies, 632
Function-Based Condition Indexing for Embankment Dams, 482
Inspection, Maintenance, and Repair with Partial Observability, 620
Interface Problems Between Owners and Maintenance Contractors in Saudi Arabia, 794
Making the Trains Run On Time, 1254
Managing Railway Fixed Plant, 628
Prototype Knowledge-Based System for Corrective Maintenance of Pavements, 1140
Reliability-Based Structural Design with Markov Decision Processes, 951
Restructuring: America and Beyond, 1401
Urban Design, 816

Management
Accounting for Human Error During Design and Construction, 51
Airport Choice in Multiple-Airport Region, 1115
Book Club: Grassroots Introduction to TQM, 846
Conceptual Model of Partnering, 727
Continuous-Time Water and Sediment-Routing Model for Large Basins, 531
Demystifying the Local Agency's Process of Consultant Procurement, 725
Equipment Resource Management into the 21st Century, 1375
Estimation of Infrastructure Transition Probabilities from Condition Rating Data, 622
Estuary Management by Stochastic Linear Quadratic Optimal Control, 1198
Facilitating Cultural Diversity, 735
Fast Track Pros and Cons: Considerations for Industrial Projects, 726
Growth Management Techniques in the City of Carlsbad, 1146
If You Know Where You Want to Go, You May Get There, 712
Job Characteristics: Union-Nonunion Differences, 113
Markov Chain Model for Seasonal-Water Quality Management, 1171
Monte Carlo Simulation as Tool for Process Reengineering, 729
Poisson Regression Models of Infrastructure Transition Probabilities, 1107
Strategic Planning for Higher Education, 844
Taking the Pain Out of Performance Evaluations, 694
Turning Down the Power, 1322

Management methods
Manage Your Claims Before They Manage You, 702
Managing Railway Fixed Plant, 628

Measuring Effectiveness of Materials Management Process, 733
Recommended Parameters to Report with BMP Monitoring Data, 1159
Think Value Engineering, 730
What Do Project Managers Need to Know about CADD?, 696

Management planning
If You Know Where You Want to Go, You May Get There, 712
Managing Design Under Lump-Sum Contract, 704
Planning for Succession, 709

Management style
Application of Team Concept to Initiate and Develop TQM, 43
Project Management: One Step Beyond, 1343
Taking the Pain Out of Performance Evaluations, 694

Management systems
Developing Infrastructure Management Systems for Small Public Agency, 635
Highway Management Systems: State of the Art, 630
Object-Oriented Methodology for Materials-Management Systems, 158

Manpower
Forecasting Engineering Manpower Requirements for Highway Preconstruction Activities, 715

Mapping
Chicago Remaps Itself, 1300
Estimating Cost for Photogrammetric Mapping and Aerial Photography, 1070

Marine clays
Colinearity of Stresses, Strains, and Strain Increments During Shearing of Soft Clay, 447

Market research
Choosing a Civil Engineering Career: Some Market Research Findings, 841
Competition and Future Needs of International Clients, 845
Straight from the Source, 701

Marketing
Avoiding the Database Quagmire, 710
A Management Approach to Placing Articles in Engineering Trade Journals, 724
Marketing Function in U.K. Construction Contracting and Professional Firms, 720
Optimization of Transfers in Urban Water Supply Planning, 1161

Markov chains
Markov Chain Model for Seasonal-Water Quality Management, 1171

Markov process
Inspection, Maintenance, and Repair with Partial Observability, 620
Poisson Regression Models of Infrastructure Transition Probabilities, 1107
Random Vibration of Nonlinear System under Non-white Excitations, 234
Reliability-Based Structural Design with Markov Decision Processes, 951
Stochastic Damage Accumulation Model for Composite Laminates, 308

Masonry
Compressive Strength of Reinforced Masonry Under Lateral Tension, 884
Inelastic Design of Infilled Frames, 915
Limit Behavior of Stone Arch Bridges, 961
The Masonry Arch Reconsidered, 44
Masonry Sewer Rehab, 1333
Residential Construction Failures Caused by Hurricane Andrew, 780
Seismic Response of Full-Scale Five-Story Reinforced-Masonry Building, 11
Stability of Masonry Walls Subjected to Seismic Transverse Forces, 1029
Three-Leaf Stone Masonry Strengthened by Injecting Cement Grouts, 936

Mass transfer
Inner Region of Smooth Pipes and Open Channels, 568

Mass transport
Kinetics of Biofilms in Unsaturated Granular Media, 335
Validation of Water-Quality Model for Seneca River, N.Y., 1180

Mass transportation
Bart to the Future, 1280

Materials
Advances in Underground Pipeline Engineering II, 1361
Monte Carlo Simulation as Tool for Process Reengineering, 729
Parallel Elastoplastic Models of Inelastic Material Behavior, 290
Standard Practice for Shotcrete, 1410

Materials, properties
Constitutive Models for Healing of Materials with Application to Compaction of Crushed Rock Salt, 294
Construction with Large Stone, 1369
Properties of Lunar Soil Simulant JSC-1, 27
Standard Practice for Concrete for Civil Works Structures, 1409
Static and Dynamic Properties of Gravelly Soils, 1411

Materials testing
Hydraulic Resistance of Steel Sheet Pile Joints, 440
Properties of Lunar Soil Simulant JSC-1, 27

Mathematical models
Accounting for Human Error During Design and Construction, 51
Depth-Averaged Open-Channel Flow Model, 554
Disappearance of Reduced Manganese in Reservoir Tailwaters, 355
Dynamical Systems with Rigid-Body Degree-of-Freedom Oscillators, 220
Explicit Mathematical Models of Distribution Storage Water Quality, 584
Fire Resistance of Rectangular Steel Columns Filled with Bar-Reinforced Concrete, 930
Flow Investigation for Landfill Leachate (FILL), 333
Hexavalent Chromium Removal in Two-Stage Bioreactor System, 417
Mathematical Model for Bore-Injected Cement Grout Installations, 503

Model of Carbon Cycling in Planktonic Food Webs, 399
Modeling Benthic Oxygen Uptake by Pumping, 336
Modeling of Particulate Media Using Discontinuous Deformation Analysis, 307
Modeling Removal of Air Contaminants by Biofiltration, 331
Multiphase Approach to Thaw Subsidence of Unsaturated Frozen Soils: Equation Development, 215
Nearshore Bar Development in Southern Gulf of St. Lawrence, 1217
Numerical Simulation of River Ice Processes, 72
Parallel Elastoplastic Models of Inelastic Material Behavior, 290
Performance and Cost Modeling of Ultrafiltration, 427
Response of Chesapeake Bay to Nutrient Load Reductions, 383
Simulation and Analysis of Upper Niagara River Ice-Jam Conditions, 73
Simulation of Long-Term Trends in Chesapeake Bay Eutrophication, 356
Solution and Evaluation of Permafrost Thaw-Subsidence Model, 216
Temperature Distribution in Walls and Roofs, 56
Vehicle Kinematics and its Application to Highway Design, 1084

Mathematical programming
Dominant Failure Modes for Structures With Stochastic Load Processes, 309
The Tonias Algorithm, 1073
Unified Approach to Local Stability of Plate/Stiffener Assemblies, 195

Mathematics
Intersection of Spiral Curve with Circle, 1066
Metric Units in Engineering-Going SI, 1394
Theoretical Prediction of Drying Shrinkage of Concrete, 764

Maximum probable flood
Sensitivity to Probable Maximum Flood, 673

Measurement
Characterization of Rainfall under Center Pivot: Influence of Measuring Procedure, 675
Estimating Hydraulic Conductivity for Models of Soils with Macropores, 644
Evaluation of Evaporation-Pan Networks, 674
Graphical-Based Method for Transient Evaluation of Construction Operations, 132
Novel Design for Constant-Pressure Water-Displacement Gas Collector, 405
Operational Strategy for Metal Bioleaching Based on pH Measurements, 381
Tracking Dynamical Changes in Mud Bed Due to Waves, 560

Measuring instruments
General End-Depth–Discharge Relationship at Free Overfall in Trapezoidal Channel, 649

Mechanical engineering
Parallel Elastoplastic Models of Inelastic Material Behavior, 290

Mechanical properties
Experimental Investigation of Tensile Fracture in Polyurethane Foams, 773
Mechanical Properties and Water Diffusion in Polyester Polymer Concrete, 322
Mechanical Properties of Polyurethane-Foam Impact Limiters, 224
Overview of Recent Program on Mechanical Properties of Sea Ice, 79
Soil-Tool Interaction Theories as They Apply to Lunar Soil Simulant, 28

Mechanics
Nonlinear Behavior of Concrete Dams Using Damage Mechanics, 223

Mediation
Use of Alternative Dispute Resolution in the Construction Industry, 700

Membrane processes
Performance and Cost Modeling of Ultrafiltration, 427
Seismic Forces in Spherical Domes: Membrane Solution, 311

Membranes
Beam-Type Bending of Space-Based Inflated Membrane Structures, 31
Cost Model for Low-Pressure Membrane Filtration, 13
Fouling of Reverse Osmosis Membranes by Aluminum Oxide Colloids, 428
Fractal Approach to Measuring Roughness of Geomembranes, 469

Membranes, linings
Flexible Membrane Liners, 1282

Memoirs of deceased members
Ammann, Werner, 1423
Anderson, Boyd G., 1424
Escobar, Baudelio C., 1425
Rifkin, Mark Julian, 1426

Mercury
Hg(II) Adsorption from Aqueous Solutions Using Rice-Husk Ash, 374

Mergers
The Urge to Merge, 1263

Metals
Anisotropic Damage of Fiber-Reinforced MMC Using Overall Damage Analysis, 304
Geometric Models of Deployable Metal Domes, 55
Removing Metals From Soil, 1344
Washing of Zinc (II) from Contaminated Soil Column, 345

Meteorological data
Sensitivity to Probable Maximum Flood, 673

Methane
Apparatus for Down-Well Oxygen Transfer into Contaminated Aquifer, 385
Model for Treatment of Trichloroethylene by Methanotrophic Biofilms, 7

Methane generation
UASB Treatment of Wastewater Containing Concentrated Benzoate, 409

Methodology
Comparison of Methods for Estimating REF-ET, 687
Modified Transformation and Integration of 1D Wave Equations, 591

Postoccupancy Evaluation of Buildings and Development of Facility Performance Criteria, 49
Uncertainty in the National Energy Modeling System. I: Method Development, 171
Uncertainty in the National Energy Modeling System. II: Analysis of Results, 172

Metric systems
Metric Units in Engineering-Going SI, 1394

Mexico
NAFTA Handbook for Water Resources Managers and Engineers, 1395

Micro piles
Foundation Upgrading and Repair for Infrastructure Improvement, 1377
A Primer on Micropiles, 1358
